**6537 L J Nijmegen, Netherlands**

Dear Mr. Anton,

Realino Foundation, until now, still seeking scholarships for children from poor families. Education is still the most important aspect for human life, if we want to alleviate the children from their poverty, we need to give them adequate education. But, in our consideration, the poor children need basic education and vocational education. Through that level of education, they can survive because they can find job for living. Continue to pursue higher education are also important but for the poor it was not urgent, because the most important is they can find job.

On 2016 scholarship applicants more than in 2015 with more complex problems. Based on the data from the scholarship applicants this year (2016). Scholarship applicants not only from a poor family but also come from troubled families. Some family problems that we found are divorce, conflict, struggle for inheritance, and other problems. Family problems interfere the entire family life, including economic problems. Divorcing parents make the economic situation is unstable, and the children become victims, they find difficulties to send their children to school because of economic condition. Scholarship applicants who come from divorced families nearly 30% of all applicants.

With the complexity of the problems especially family problems, we estimate that there will be many applicants' scholarships especially those who come from troubled families. We reflect that increased prosperity does not guarantee family life can live well.

Based from the data of the applicant, we have new awareness when we visited some elementary school in Jogjakarta. We realized that there are a lot of families that face difficulties to send their children to school due to economic conditions. We saw the economic discrepancy between the rich and the poor. Unfortunately, there are a lot of poor families

\* SKPI is Stichting Kleinschalige Projecten Indonesië (Foundation Small Scale Projects Indonesia)  
KvK: 53956168.  
RSIN: 8510 89 136

that not get support from government. From that data, we reflected and decided that the urban poor are priority for us to help.

Realino still want to help children from poor families of this, and because of our limitations, we still need help. So, again, we invite the board of the SKPI to support us by give scholarship to the poor children. Through your help and support, we can send more and more children to go to school, giving them hope for the better future.

Hopefully, you will support our project by give us funds and we will distribute that fund to the poor children. May God give health and blissfulness to you all.

Yogyakarta, 8<sup>th</sup> October 2016

Yohanes Adrianto Dwi. M, SJ  
Director of Realino Foundation

## II. **Project**

### 1. **Organization**

Realino Foundation has two projects. First, distribution of scholarship for the poor children from the donor as a main project. Second, workshop/training in wood and welding for the young people so they have skills to find job.

The aim of the main project is; education for all children, especially for the poor. All Children have their rights to get education to prepare their future. The problem is that many children still cannot go to school because of the economic condition.

Based on that awareness, the strategies to perform this project are:

- Finding donors (from communities, institutions or individuals) and we offer the rich families to be foster parents of the poor children.
- Working in a team. We involve volunteers which are university students who around the time of application (June) would usually be in their semester break. During the semester break, they usually go back to their hometown. We ask

them to observe and interview applicants for our scholarship program from their own village. They use a form of observation and interviews that we specify. For example, the university student from Wonosari will visit and interview scholarship applicants from Wonosari and so on. So it is possible to visit the scholarship applicant one by one.

## **2. Description of the project**

All children have rights to get education. Through education, people will have bigger perspectives, bigger chance to make a better future. This awareness makes us try to find donors to pay the schools tuition for the poor children. But, in providing scholarships, we have to be very careful.

In my proposal (2017), I have targeted to give scholarship for 450 students. But, I asked SKPI to support 249 students from 450 students we targeted and we try to get donation from local donors for 201 students. The problem is we never know the schools tuition on the new semester so the calculation we made is average for each child. We have estimation for elementary is Rp. 325.000/semester, junior school is Rp. 412.088/semester and for the vocational high school is Rp. 900.000/semester. We open registration for applicant 1-20 of June, and all applicants will be selected (observation and interview) and announced on July 20. We can't predict how much new applicant will apply, in what grade they are, and how much the school tuition.

We give the scholarship depending on the condition of the parents. Most of the parents asked support only for school tuition. But, some parents also need more support. They also asked support for books and school uniforms. The proposal that we give to you is scholarship that is only for school tuition.

We tried to involve schools and parents to determine the amount of scholarships will be given. Because of these considerations, the scholarship amount will be different.

Differences in the amount of scholarships are based on several considerations:

- Depending on the School Committee.

The different amount of the scholarship depends on the kind of school, either public or private school. First, usually the school tuition of private school is more expensive than public school. Second, to decide the school tuition, the government asked each school to make the "school Committee". The School

Committee consist of several element; representatives of teachers, parents, advisory, government, etc. The School Committee will consider and decide the school policy, including school tuition, payment of books, uniforms, etc. So each school can make a different decision about the tuition.

- Depending on the condition of the parents.

Our scholarship program do not merely support parents to pay school tuition. We also asked contribution from the parents. Principally we collaborate with parents. We encourage parents not to solely depend on us, but they should strive to contribute to the education of their own children. No matter what or how much contribution they can give, the most important thing is their effort to support their children. Sometimes the parent can contribute 25% of the school tuition. Sometimes the parents can provide uniforms and books for their own children.

- Depending on the results of observations and interviews.

We base our decisions of the amount of the scholarship given on the observations and interviews with the applicants and the parents. If we realize that the parents need more support, we will try to give more. But if according to observations and interviews the parents have capability to give contribution to their children, we asked them to give a contribution.

### **3. Purpose and Aim**

Targets of this project are poor children can complete primary education (elementary and junior high school) and gain skills from vocational schools. We have targeted 450 children from elementary schools to vocational high school and 15 young people undergoing training in the workshop.

There are many things that unpredictable when accepting scholarship applicants:

- The school tuition

Every year we have discussed with the school and parents to decide the scholarship we will give to the student. Nonetheless, we have to estimate the school tuition. We have estimation for elementary is Rp. 325.000/semester, junior school is Rp. 412.088/semester and for the vocational high school is Rp. 900.000/semester. We prioritize donations from SPKI for elementary school students and junior high school student.

- The applicant

Every year, we can't predict how much student from elementary, junior high school and vocational high school student will apply. In 2016, we have a target to receive 450 children from 560 applicant. We did not impose the number of the candidates based on the targets but based on selection. After selection process, we received 438 children. From 438 student, SKPI helps 249 student; 88 elementary student, 145 junior high school student and 16 vocational school student.

In 2017, we have a target to give scholarships to 450 children. From that number, we asked SKPI to support 249 children, the rest, we will look for local donors. We are aware that it is not easy to find a local donor, but we should try to involve everyone to care these poor children. We invite local institution and individual to support these children through some programs; foster parent, peer helper, etc. Attempts to involve local donors also encourages them to care to the poor.

#### 4. Planning

The project will be for one year and will be annually renewed.

#### 5. Evaluation

Evaluation is done by academic result of scholarship recipients. Evaluation for the training workshop is done by observing workshop productivity; more productivity means more skilled trainees.

### III. Financial

#### 1. Financial estimation

##### a. Scholarship for 450 children

Item	Detail	Quantity	Estimation
2 <sup>nd</sup> semester, January 2017- June 2017	<b>Continuous scholarship (listed below);</b> <ul style="list-style-type: none"> <li>• 88 elementary students,</li> <li>• 145 junior high school students,</li> <li>• 16 vocational students.</li> </ul>	<ul style="list-style-type: none"> <li>• Rp. 22.350.000</li> <li>• Rp.</li> </ul>	<b>Rp. 86.344.000</b> (January-June 2017)

#### IV. **Overseeing the Progress**

##### 1. Specification of expenditure

We will ensure that all fund you give will be well manage (all the transactions and receipts will be documented).

##### 2. Report of Progress

Realino Foundation will report the progress of the project per semester (6 month) after we distribute the scholarship to the children.

Yogyakarta, 26<sup>th</sup> December 2016

Yohanes Adrianto Dwi. M, SJ

Director of Realino Foundation
